

# Show What You Know

- Create a 3-section flipbook that uses each section to describe the environmental issues of monsoon winds, river pollution, and Asian Brown Cloud.
  - Use personification as your technique to describe the situation. ( ex: I am Brown Cloud.)
  - Include a description of the issue, its cause and effect, and possible solutions to the problem.
  - Draw a picture on the front and put your information on the inside.

# Example

Outside flap

I am the Yangtze River. Once, I was a mighty river and the location of the beginning of civilization in China. I supplied both food and water to my people. Now, my water and the food I help provide poison my people. Their agricultural and industrial waste have polluted me beyond all safe levels. I feel sad and useless. If only my people would enforce laws to protect me from those waste products and clean up the damage already done, I could again provide clean, safe water for the people and the food I help provide would again nourish a nation.
